- Address : Yebisu GardenPlaceTower 27F, 4-20-3, Ebisu, Shibuya-ku, Tokyo, Japan
- Employees : 20
- Established in : 2017
- Business : Development and operation of the Open WebGIS platform "Re:Earth"

## Project Name

Business Model Validation for the Open WebGIS platform "Re:Earth" in Peru and Ecuador

## Cooperation with Local Companies

## Local Economic / Social Issues

LAC countries along the Pacific coast are experiencing floods and droughts due to heavy rainfall caused by the El Niño/La Niña phenomenon. Therefore, disaster prevention and preparedness in every municipalities is an urgent issue.

## Details of Demonstration

Conducted PoCs for visualization of tsunami and landslide disaster information using Re:Earth, can visualize geospatial information in 3D, in 4 cities. Through PoCs, Eukarya Inc will investigate the price appropriateness of a business model that combines GIS training, data collection, and plug-in development in collaboration with local companies and ministries and the feasibility of the business model using local companies as an agent (distributor).

## Expected Outcome in the future

- Improvement of disaster prevention and mitigation capacity of implementing government agencies
- Raise citizens' awareness of disaster prevention
