

JICS Profile

Real Aid in Action

JICS' Vision and Mission

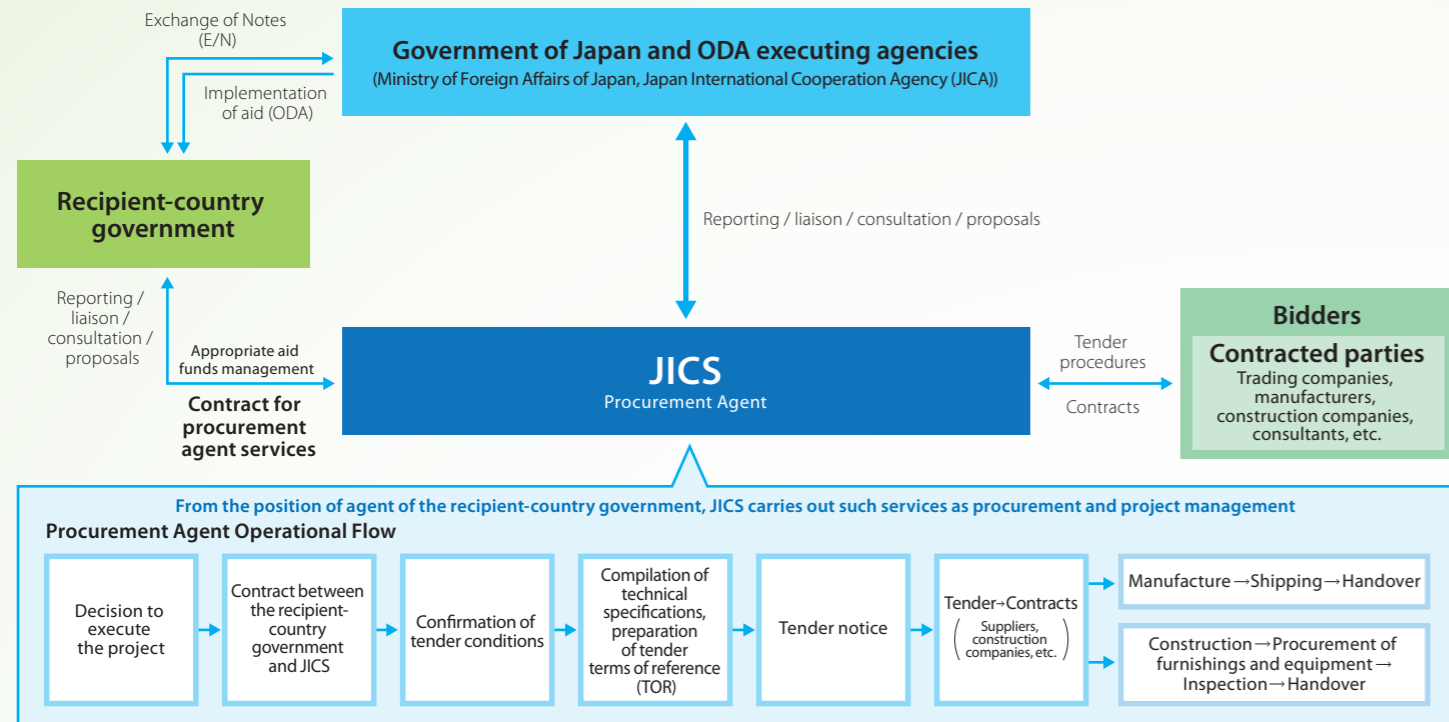

The Government of Japan provides Official Development Assistance (ODA) as a key policy to contribute to the international community, with the objective of helping resolve the global issues set out in the United Nations (UN) Sustainable Development Goals (SDGs) and realizing "quality growth" in developing countries, among others. Japan International Cooperation System (JICS) was established in April 1989 to help promote, in particular, bilateral grants such as grant aid-related operations in ODA. As a "procurement expert" in international cooperation, JICS is engaged in various international cooperation-related projects, in addition to providing procurement agent operations, which involve procurement and management by fulfilling the role of procurement agent for the governments of recipient countries.

In order to contribute to the peace and stability of the international community, JICS—a neutral organization that possesses public procurement know-how—will make aid and international cooperation-related projects tangible in a way that best suits the needs of the front line through the provision of services with even greater added value, with the aim of becoming an international cooperation "integrator" that links various actors' needs, policies and partners.

President TAKEUCHI Kazuki
Japan International Cooperation System (JICS)

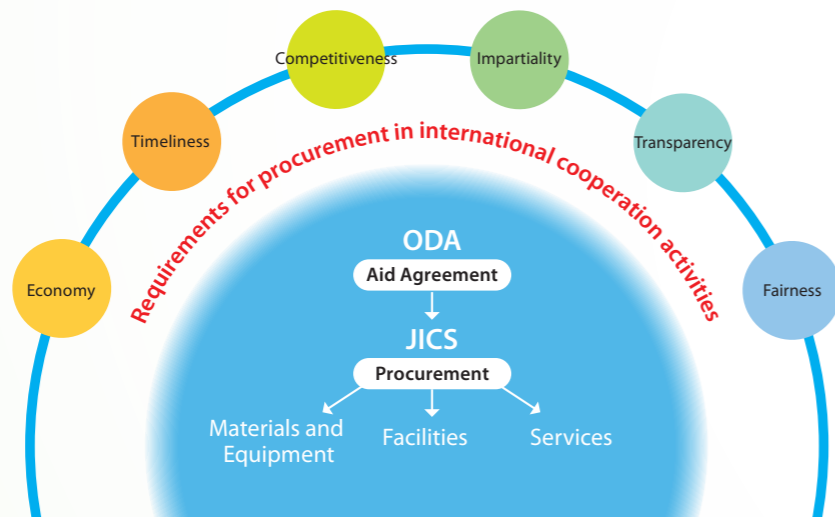

JICS' Position within Japanese Government's Grant Aid Projects

JICS' Role

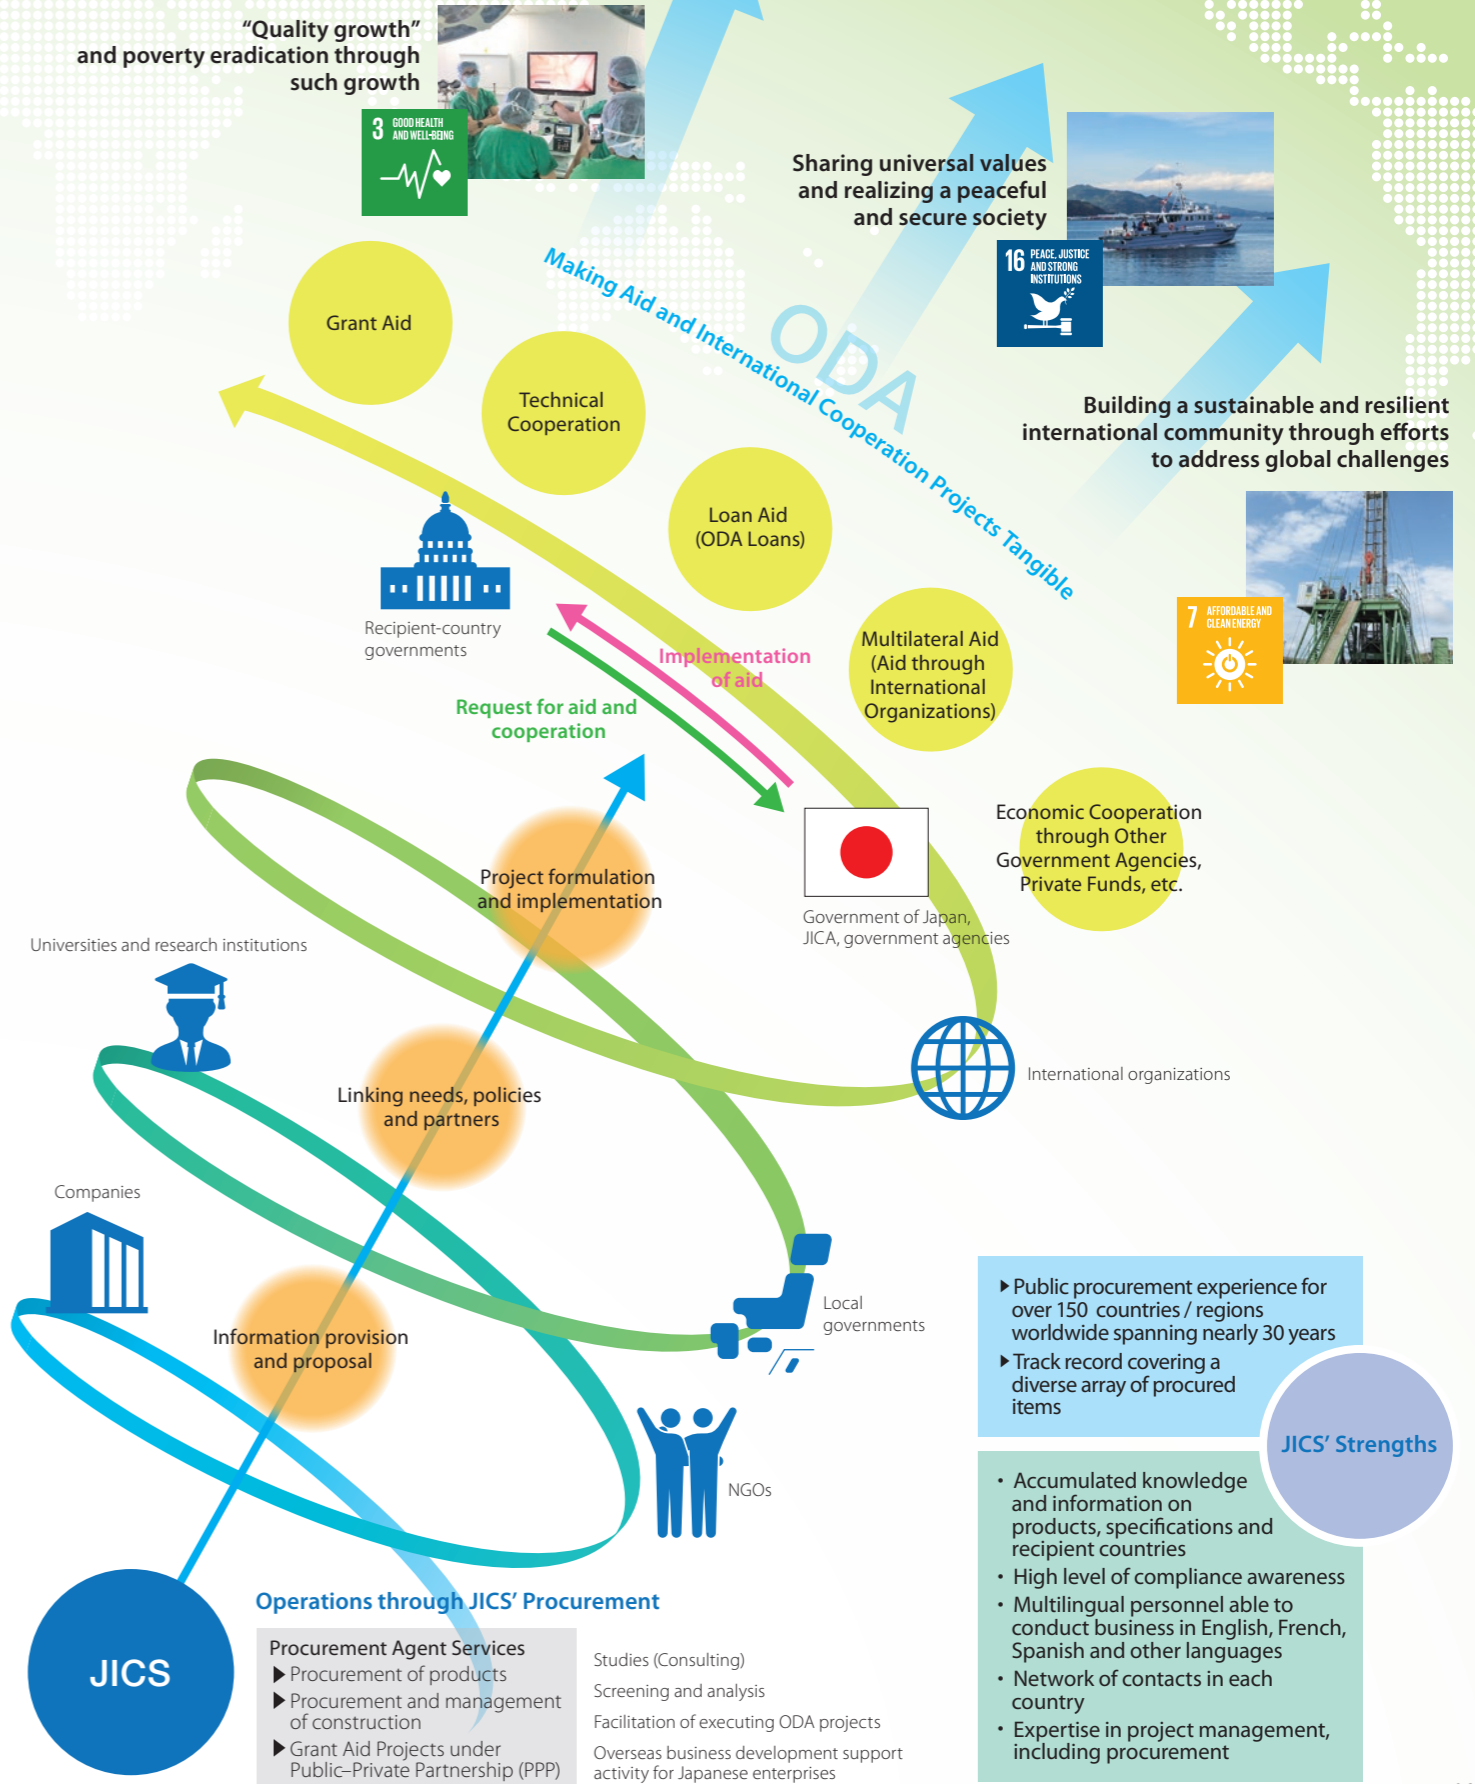

Procurement using ODA funds which are sourced from taxes requires appropriate aid funds management, in addition to the purchase of materials, equipment, facilities and services through tender and other such processes according to public procurement rules, in order to ensure fairness and competitiveness. A procurement organization such as JICS, which has expert knowledge and know-how on public procurement as well as procurement in a wide range of fields, carries out these procedures on behalf of the recipient-country government.

In procurement agent operations, JICS enters into a procurement agent agreement under which JICS will serve as the recipient-country government's procurement agent, and after checking the specifications for materials, equipment and facilities, as well as delivery and construction conditions, JICS executes the tender process, selects suppliers and construction companies and enters into an agreement with them, and manages the progress of the project and the aid funds up until the handover of the materials, equipment and facilities.

The Role of JICS, Which Aims to Become an "Integrator" of International Cooperation

Targeting Approaches That Best Suit the Needs of the Front Line through Close Cooperation between Various Actors

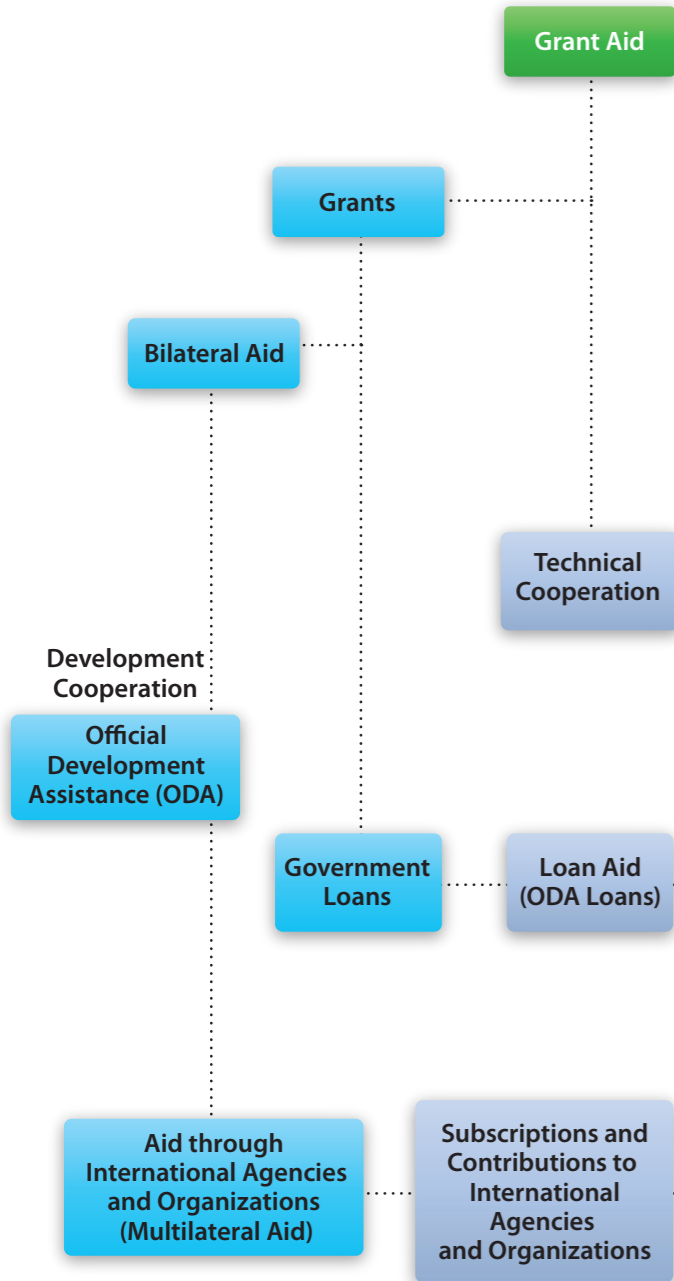

JICS' Main Activities

JICS is involved in a wide range of ODA-related activities. In particular, within Japan's Grant Aid program (a form of assistance whereby funds are provided to developing countries without the obligation for repayment), JICS' main operations are procurement agent services. In these operations, as the agent of a recipient-country government, JICS provides procurement services and handles project management, including the management of aid funds.

JICS is also engaged in procurement-related operations and studies within technical cooperation projects, loan aid (ODA loans) projects and international cooperation projects by international agencies and organizations.

Utilizing the experience accumulated in these ODA programs, JICS also provides support services to private-sector companies expanding their operations overseas.

JICS' sphere of involvement in ODA-related programs

Grant Aid-Related Operations

In addition to providing procurement agent services, JICS carries out document screening services and other operations.

Grant Aid

- The Economic and Social Development Programme, etc.
- Support for quantity surveys and other studies carried out by consultants within preparatory surveys for JICA-led cooperation projects

Grant Aid for the Food Assistance Programme (KR)

Emergency Grant Aid

Cultural Grant Assistance

Studies and procurement management services

Grant Assistance for Japanese NGO Projects

Screening of application documentation

Projects for which JICS provides procurement agent services

Projects in which Japan's outstanding technologies contribute to the development of developing countries

Procurement of products manufactured by Japanese enterprises (e.g., medical equipment, products of small/medium-sized enterprises, disaster prevention equipment, next-generation vehicles)

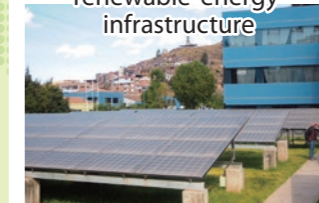

Project management for a grant aid project under Public-Private Partnership (PPP) focusing on the development of water supply infrastructure by a Japanese enterprise

Removal of landmines

Development of renewable-energy infrastructure

Food Assistance (KR)

Emergency Grant Aid

Construction of schools and health centers

Construction of roads and bridges

Technical Cooperation-Related Operations

JICS dispatches experts to provide various specialized services. These include: (1) capacity building for procurement staff at the recipient country's project-executing agency, and (2) equipment studies, compilation of specification documentation and procurement operations.

- Formulating basic plans in the disaster prevention field and raising awareness relating to disaster prevention by holding seminars
- Construction project execution supervision in collaboration with consultants in a test well drilling project for geothermal development

Loan Aid-Related Operations

Based on services commissioned by JICA, JICS has experience principally in the three types of support operations listed below.

1. Primary checks of procurement-related documents prepared by the borrowing country

2. Facilitation of executing ODA Loan projects
 3. Ex-post procurement audits
- Furthermore, JICS is engaged in ODA Loan project execution supervision consulting (The Project for Modernization of Agricultural Machines and Equipment (Moldova)).

International Agencies and Organizations-Related Operations

JICS has experience in such procurement operations as utilizing funds from international agencies and organizations: procurement of research equipment, materials for dealing with infectious disease and animal health, disaster-reduction equipment and telecommunications equipment; maintenance of customs

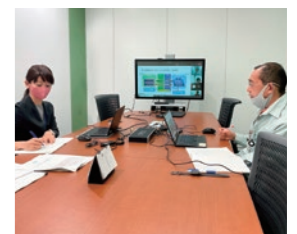

clearance facilities; and development of disaster prevention systems, shipping route systems, etc. Also, JICS has dispatched a procurement specialist to the Japan Fund for the Joint Crediting Mechanism (JFJCM), which aims to spread low-carbon technologies and is managed by the Asian Development Bank (ADB).

"J-Partner" Overseas Business Development Support Activity

JICS, as a partner, supports Japanese private-sector enterprises in their overseas business development activities with their excellent technologies, products and know-how.

- Joint planning of in-country studies
- Joint preparation and implementation of business plans
- Business support through secondment for commercialization assistance and business expansion of small companies

CSR Activities: NGO Support Activities

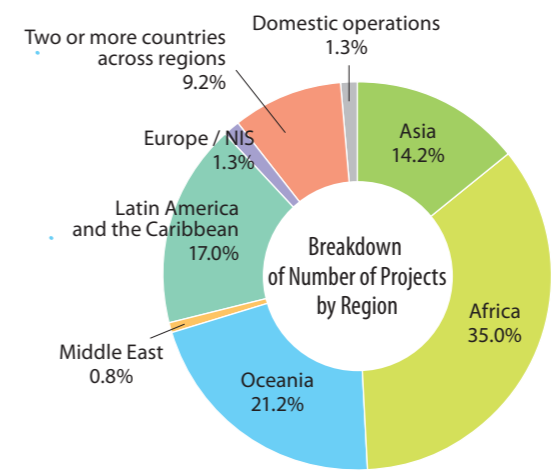

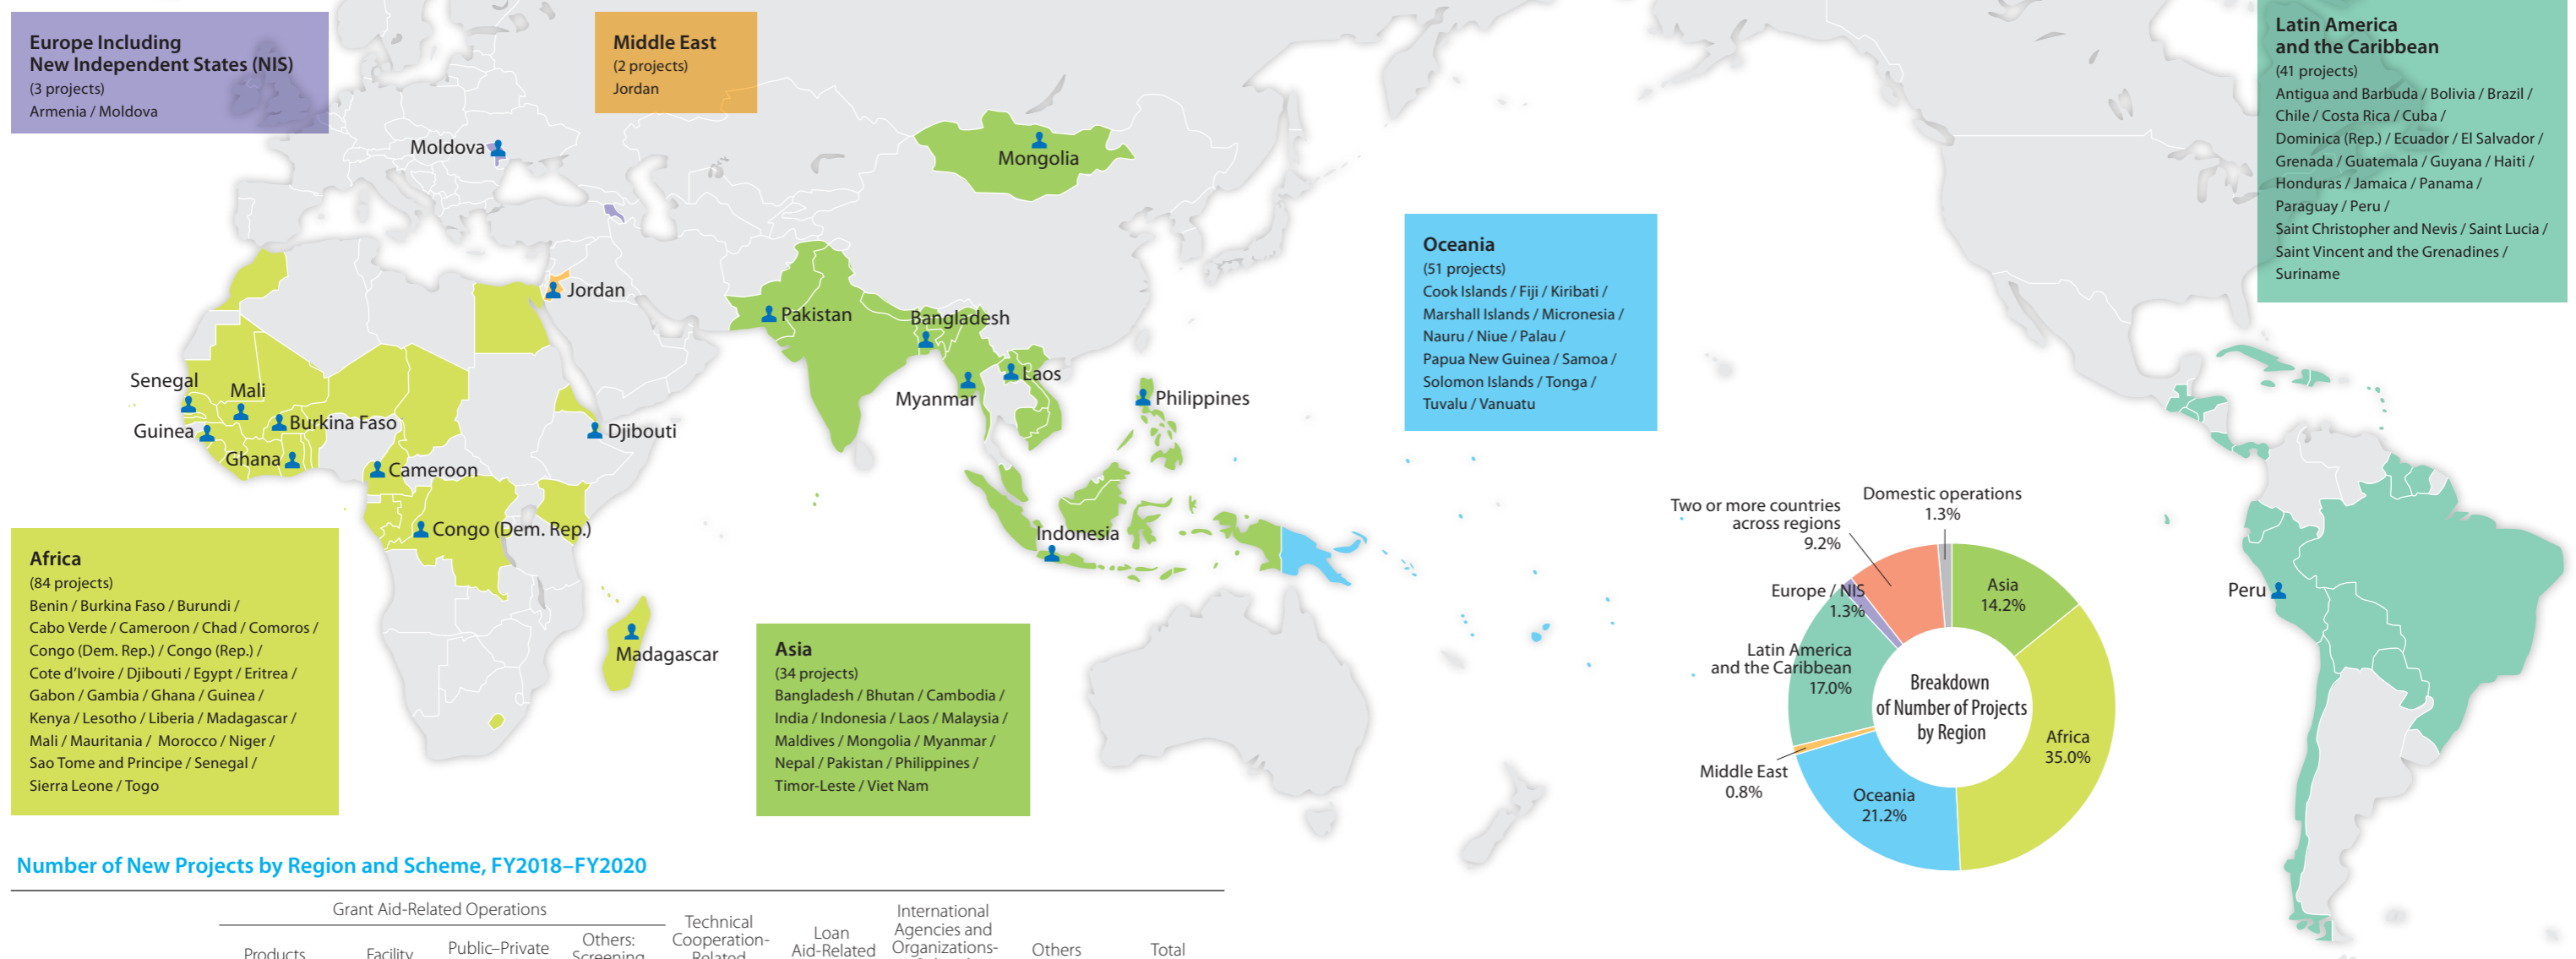

In an ongoing program, each year JICS provides financial assistance to several Japanese NGOs involved in international cooperation-related activities.

(Grant amount)
Capped at ¥1 million or ¥1.6 million per fiscal year, approximately 7 to 10 organizations each year

Countries Targeted for JICS' Main Projects

(FY2018–FY2020 New Projects)

👤 Coordinators: 20 people in 19 countries
(As of March 1, 2022)

Number of New Projects by Region and Scheme, FY2018–FY2020
