

National Reference Laboratory For Poultry Diseases

Mr. Toru Nakatani,
The President,
Japan International Cooperation System,
Tokyo, Japan

October 12, 2010

Dear Mr. Toru Nakatani:

It gives me great pleasure to bring to your kind notice the contributions made by your staff at JICS office Islamabad and Japan while fulfilling the contract assigned, awarded to JICS by the Japan Trust Fund Project/OIE on Highly Pathogenic Avian Influenza, here at this lab in Pakistan. This contract in fact included fulfillment of number of activities including lab renovation, supply of equipment, material & reagents to the National Reference Lab for Poultry Diseases, NARC, Islamabad.

In addition to the above a special donation of protective gowns for lab usage was also arranged by JICS, which were found to be quite handy for our lab work dealing with infectious agents. It is anticipated that the supplied quantity will be sufficient for our needs upto six month period.

All the above listed activities were fulfilled to the satisfaction of project management and the end user in line with the approved work plan. It is therefore quite heartening to appreciate the contributions of all JICS staff involved, directly or indirectly, in implementation of this project. Our lab officials are quite satisfied with the professionalism and cooperation extended by JICS during this period. We are especially indebted to your goodself for placing such a professional group of people here in Pakistan office and also involving high calibre individuals from Japan office for implementing & completing the above narrated assignments.

We look forward to interact with JICS under some other projects in future.

Sincerely,

(Khalid Naeem)
Program Leader/
Chief Leader
