Project Name

The feasibility study of development of digital Agri-instruction & carbon credit creation (Bangladesh)

Cooperation with Local Companies

Alliance with UGI for development of database and data analysis, with ANтар for microfinance and Agri-training to rice farmers

Local Economic / Social Issues

- Rice farming in Bangladesh ranks 3rd in the world.
- The potential of carbon crediting has been disturbed by lack of system.

Details of Demonstration

- Introduce data collecting module to agriculture with process-data collection and analysis through mobile devices.
- Monetize database in carbon credit selling and developing a value-chain of agriculture

Expected Outcome in the future

- Increasing profit through carbon credit selling
- Increasing profitability and efficiency in agriculture
- Stabilizing agriculture business by financial assistance with microfinance/insurance
