□ Address : Nishimura-building 6F, 3-10-36, Tachibanadori-nishi, Miyazaki-shi, Miyazaki, 880-0001, JAPAN

□ Employees : 16

□ Established in : 2008

□ Business : Development and sales of software and applications related to e-learning, construction and operation of e-learning services, production of learning videos, etc.

Project Name

Feasibility study of e-learning aimed at promoting DX in the field of education (Republic of Vanuatu, Papua New Guinea, Solomon Islands)

Local Economic / Social Issues

The countries of Oceania such as Vanuatu have lack of teaching materials, teachers and school facilities due to island nations spread over a vast area, which means they have an issue of provision of equity and quality education.

Cooperation with Local Companies

- Production of learning videos and tests in cooperation with the local mathematics teacher association SHEMATA to build e-learning.
- Collaboration with local company SOUTH PACIFIC TOURS to conduct market research.

Details of Demonstration

Construction and feasibility study of math e-learning for primary school students that does not require printing or distribution to guarantee quality educational opportunities, utilizing our video making software "ThinkBoard Contents Creator" and learning management system "ThinkBoard LMS."

Expected Outcome in the future

It can ensure equal and high-quality educational opportunities for children in implementing countries, and have a significant impact on improving mathematics academic ability.
