Compliance

JICS' Compliance Policy

Centering on Japan's ODA, JICS collaborates in the appropriate and efficient implementation of international cooperation projects to developing regions, and through these operations promotes improvement in the quality of international cooperation. With the goal of contributing to the development of the international economy and international society and the enhancement of goodwill, JICS carries out ODA-related services, and specifically such procurement operations as competitive tenders.

These operations encompass a wide range of stakeholders, including the Government of Japan, Japanese citizens, recipient governments, the citizens of recipient countries, tenderers, contractors (suppliers, construction companies, consultants, etc.), and employees. It may be said that JICS' mission hinges on how well it is able to help stakeholders benefit from these operations.

JICS' procurement operations are equivalent to public procurement and must be performed in an appropriate manner ensuring

transparency and fairness. From this perspective, compliance is not only the cornerstone of JICS' organization and operations but may also be seen as something that leads to increased benefits for stakeholders, and thus ranks as one of JICS' most important issues.

To strengthen compliance, we place the fulfillment of the JICS Vision (please refer to "At a Glance" on the inside front cover of this report) as our primary objective. At the same time, in accordance with the JICS Code of Conduct, we are building systems to ensure a high level of fairness and transparency in the execution of our operations, implementing training programs with the goal of promoting consciousness change and skills enhancement among all employees, and conducting appropriate organizational administration. In addition, we are working to ensure proper implementation of projects in accordance with guidelines related to operational execution.

JICS Code of Conduct

Based on the JICS Vision, we pledge to act in accordance with the following ten principles, with the goal of promoting higher-quality international cooperation.

1. Behaving in accordance with our responsibilities as a public service corporation

We will act responsibly based on awareness of our role as an organization involved in international cooperation, to meet society's expectations toward us as a public-service corporation.

2. Providing high-quality services

We will endeavor to provide high-quality services in a timely and effective manner that are valuable in the implementation of international cooperation and which ensure the satisfaction and trust of stakeholders.

3. Strictly observing laws and rules

We will strictly observe all relevant laws, internal rules, societal norms and international rules. Furthermore, we will act according to social common sense and will not engage in inappropriate conduct.

4. Exercising due consideration for local conditions

In our overseas activities, we will observe local laws and exercise due consideration for local conditions, including traditions, customs, culture and the environment.

5. Practicing information disclosure

To ensure greater transparency in the management of our operations, we will maintain a proactive stance toward information

disclosure covering such areas as details of our projects and our administrative situation.

6. Managing information appropriately

We will strictly manage all information in our possession, including personal information, through compliance with laws and relevant rules concerning the protection of personal information, the implementation of information security measures and strict adherence to confidentiality obligations.

7. Respecting human rights

We will respect human rights in all circumstances and will not discriminate on the basis of sex, age, nationality, race, ethnicity, beliefs, religion, social status or physical disability.

8. Acting resolutely in response to anti-social groups

We will adopt a resolute stance toward anti-social groups or organizations that threaten social order or safety.

9. Working to protect the environment

Based on awareness that addressing environmental problems is an important part of our mission, we will undertake proactive efforts on our own initiative that contribute to environmental protection.

10. Creating a safe and satisfying workplace environment

To maintain orderly workplaces and enable officers and employees to work to the best of their abilities, we will strive to build safe and satisfying workplaces. To ensure the safety of officers and employees, both in Japan and abroad, we will develop a crisis management system and strive to achieve safe management at all times.

Compliance-related Measures

To fulfill the JICS Code of Conduct shown above, as an organization JICS has formulated the following provisions and is building up its compliance systems.

- JICS promotes compliance through the activities of the Compliance Committee as well as through the establishment of working groups as deemed necessary to deal with specific key issues.
- We have established the Office of Management Audit, which undertakes internal audits. In addition, external audits are conducted by certified public accountants and certified tax accountants.
- We have established the Office of Contract Examination, which examines the adequacy of procurement-related procedures (tenders, contract administration, etc.).
- We established a whistleblower system with the goal of preventing the occurrence of legal violations as well as facilitating appropriate responses to reports of compliance violations.

- To ensure orderliness and discipline in a fair workplace, JICS has implemented measures to prevent and eliminate harassment behavior, has assigned a counseling staff internally and implements educational programs for employees.
- In response to overseas travel alerts released by the Ministry of Foreign Affairs, JICS holds safety countermeasure meetings to consider and confirm the safety and adequacy of overseas operational travel by employees and to deliberate on safety countermeasures and provides safety countermeasure briefings for employees.
- JICS has established the Health Committee, which works to ensure employee safety and health in the workplace and implements activities aimed at maintaining a comfortable working environment.

Personal Information Protection Measures

JICS clearly specifies its personal information protection policy, the types of personal information it is obligated to protect, and the actions it takes that are necessary for the protection of personal information. With the goal of ensuring that administrative systems comply with these policies, JICS has formulated a set of basic regulations for the protection of personal information. In relation to these personal information protection measures, on June 17, 2011, JICS received accreditation under the PrivacyMark System administered

by the Japan Institute for Promotion of Digital Economy and Community (JIPDEC). On an organization-wide basis, JICS will continue to handle personal information in an appropriate manner, while at the same time working to further increase awareness among its employees of issues related to personal information protection.
