Procurement management agent services

JICS provides a range of services—based on contracts with recipient-country governments—from the standpoint of acting to support the recipient-country government in its role as the main executing authority of a project. JICS manages the overall process for the procurement of goods and selection of services in relation to grant aid projects. This may include the preparation of tender documents, tender execution, expediting the signing of purchasing contracts and supervising the manufacture, transportation and delivery of materials and equipment by contractors. JICS carries out such procurement management services for Cultural Grant Aid. (As a matter of convenience, revenue from tender assistance work for Cultural Grant Aid is also included in this category.)

Procurement agent services

JICS acts as a procurement agent of a recipient-country government—the main executing authority of a project—to procure necessary goods and equipment and to oversee facility construction for the execution of grant aid projects and other projects, primarily based on contracts with recipient-country governments. JICS provides administrative and project management services, which include the overall process for procurement (tender execution, conclusion of contracts for purchase and service, delivery and construction, etc.) as well as funds payment. JICS undertakes procurement agent services related to such schemes as Grant Assistance for the Food Aid Project, Grant Assistance for the Food Security Project for Underprivileged Farmers, Non-Project Grant Aid, Emergency Grant Aid, Grant Aid

for Conflict Prevention and Peacebuilding, Grant Aid for Community Empowerment, Grant Aid for Disaster Prevention and Reconstruction and Program Grant Aid for Environment and Climate Change.

Studies for Grant Aid projects

Based on contracts with such agencies as the Ministry of Foreign Affairs of Japan and JICA, JICS carries out analysis and screening of requests submitted to the Japanese government from recipient-country governments and other parties. This includes analysis of written requests for Grassroots Grant Aid; screening of applications and reports for Grant Assistance for Japanese NGO Projects; and follow-up surveys for Grant Aid projects.

Compilation of technical specifications, procurement and transportation of equipment

Based on contracts with JICA and other parties, JICS provides support services related to the provision of equipment to recipient-country government as part of the execution of Technical Cooperation projects. Such services include the provision of information, compilation of technical specifications, pricing studies and support for procedures from purchase through to transportation of equipment (implemented until June 2012).

Studies related to Technical Cooperation

Based on contracts with JICA and other parties, JICS dispatches personnel to JICA's overseas offices to support local procurement operations.

Dispatch of experts for Technical Cooperation

Based on contracts with JICA, as part of Technical Cooperation, JICS dispatches experts related to fields relevant to aid projects being executed by JICS.

Loan Aid-related operations

Based on contracts with JICA (JBIC before October 2008), JICS carries out basic screening of the content of procurement-related documentation submitted by recipient-country governments to confirm whether or not such documentation complies with the loan program guidelines and other requirements. If this screening reveals any problems or points that require clarification, JICS reports to JICA on its findings. In addition, JICS carried out operations to revise standard documentation for tenders conducted as part of Loan Aid projects, implemented ex-post procurement audits, and dispatched specialist staff for Loan Aid facilitation.

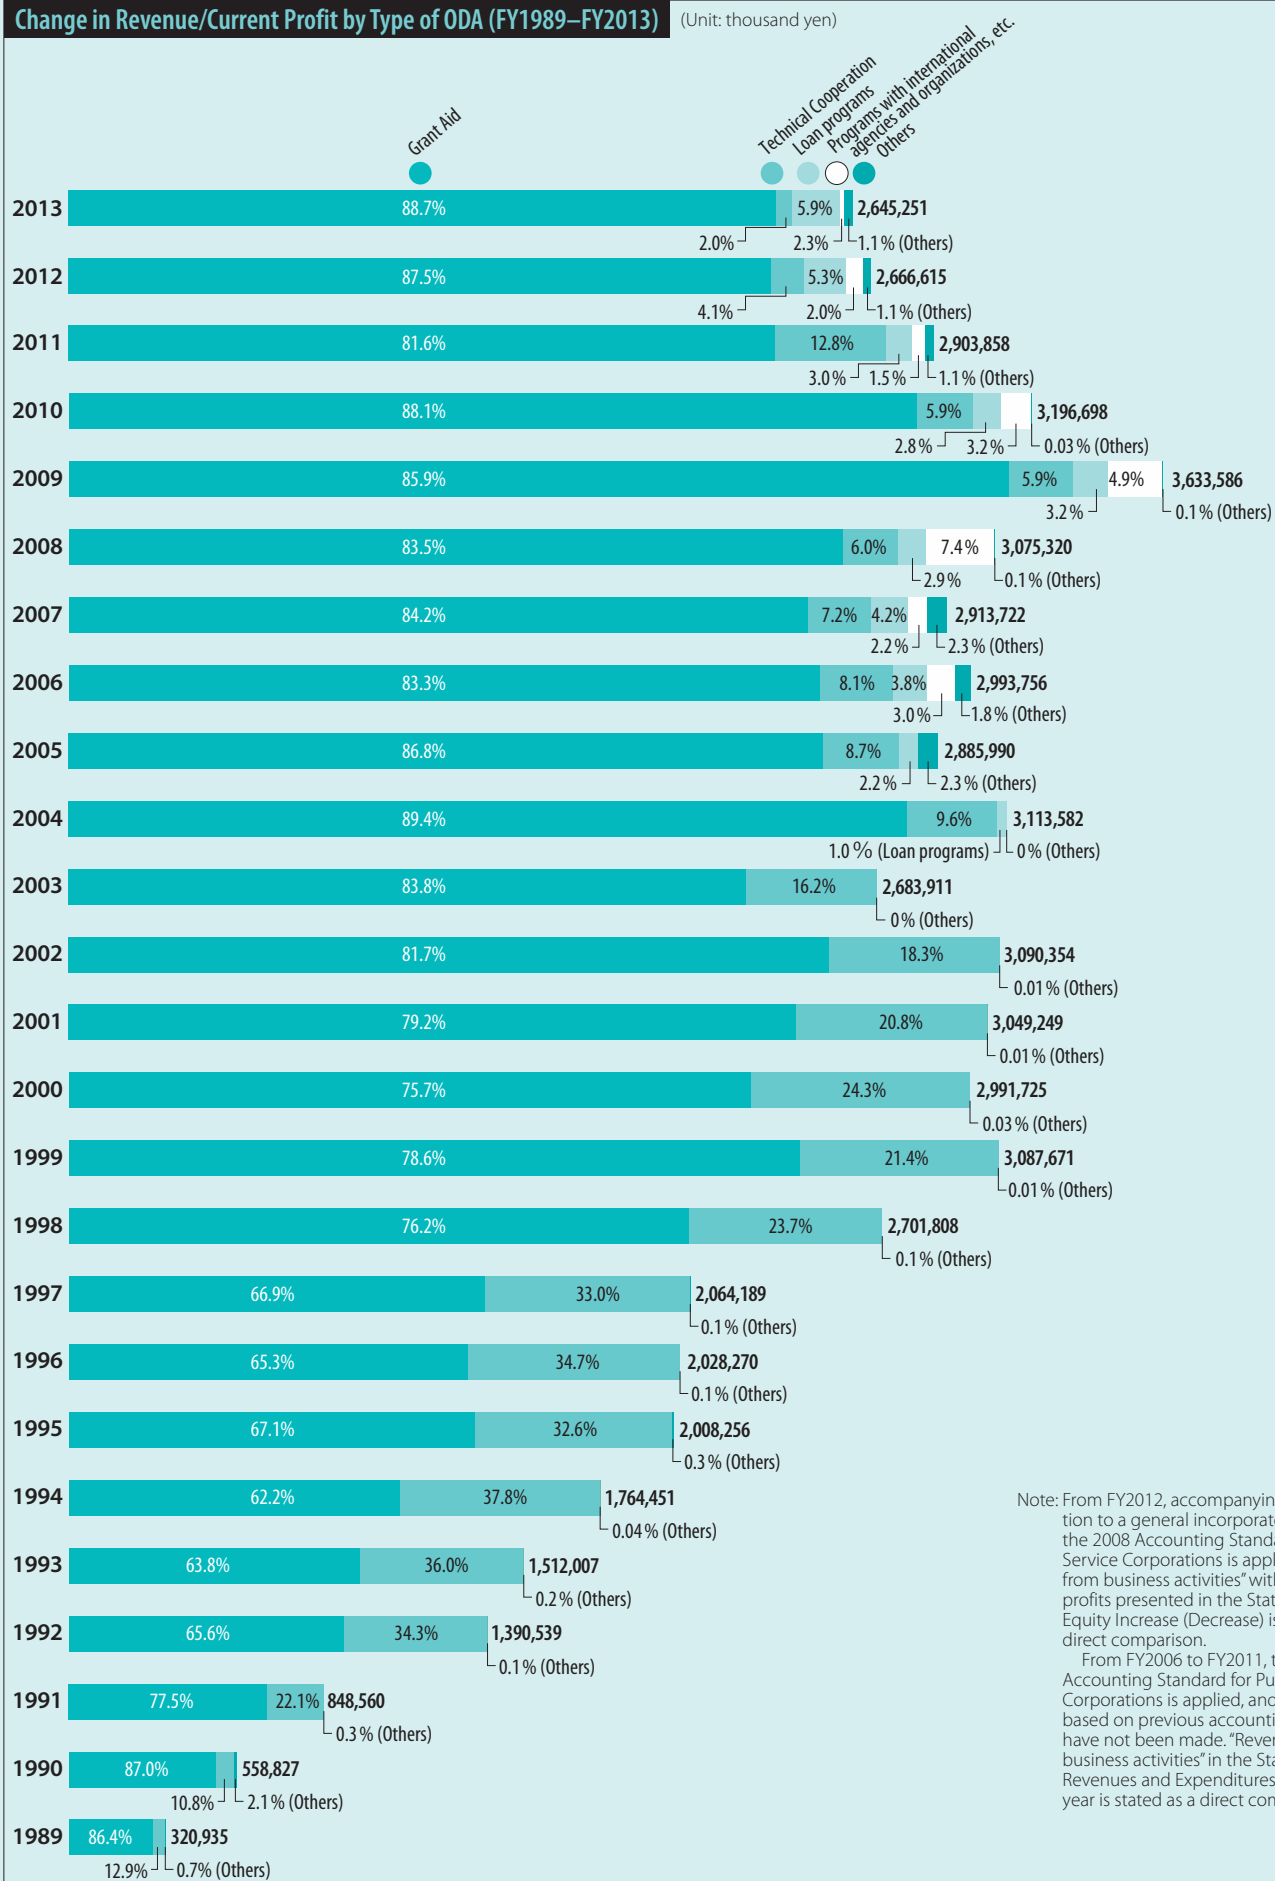

Operations related to international agencies and organizations

With regard to projects executed by international agencies and organizations, based on contracts with relevant agencies, JICS provides a range of services to meet specific project requirements. Such services include conducting studies, undertaking procurement operations in line with international rules, providing project implementation management services and reporting to and coordinating activities with international agencies and organizations.

Revenue/Current Profit by Type of ODA (FY1989–FY2013)

The chart below indicates JICS' revenue and current profit by type of ODA from JICS' establishment in FY1989 to the most recent period, FY2013.

Change in Revenue/Current Profit by Type of ODA (FY1989–FY2013) (Unit: thousand yen)

Note: From FY2012, accompanying JICS' transition to a general incorporated foundation, the 2008 Accounting Standard for Public Service Corporations is applied, and "Profit from business activities" within Current profits presented in the Statement of Net Equity Increase (Decrease) is stated as a direct comparison.

From FY2006 to FY2011, the 2004 Accounting Standard for Public Service Corporations is applied, and adjustments based on previous accounting standards have not been made. "Revenues from business activities" in the Statement of Revenues and Expenditures for each fiscal year is stated as a direct comparison.

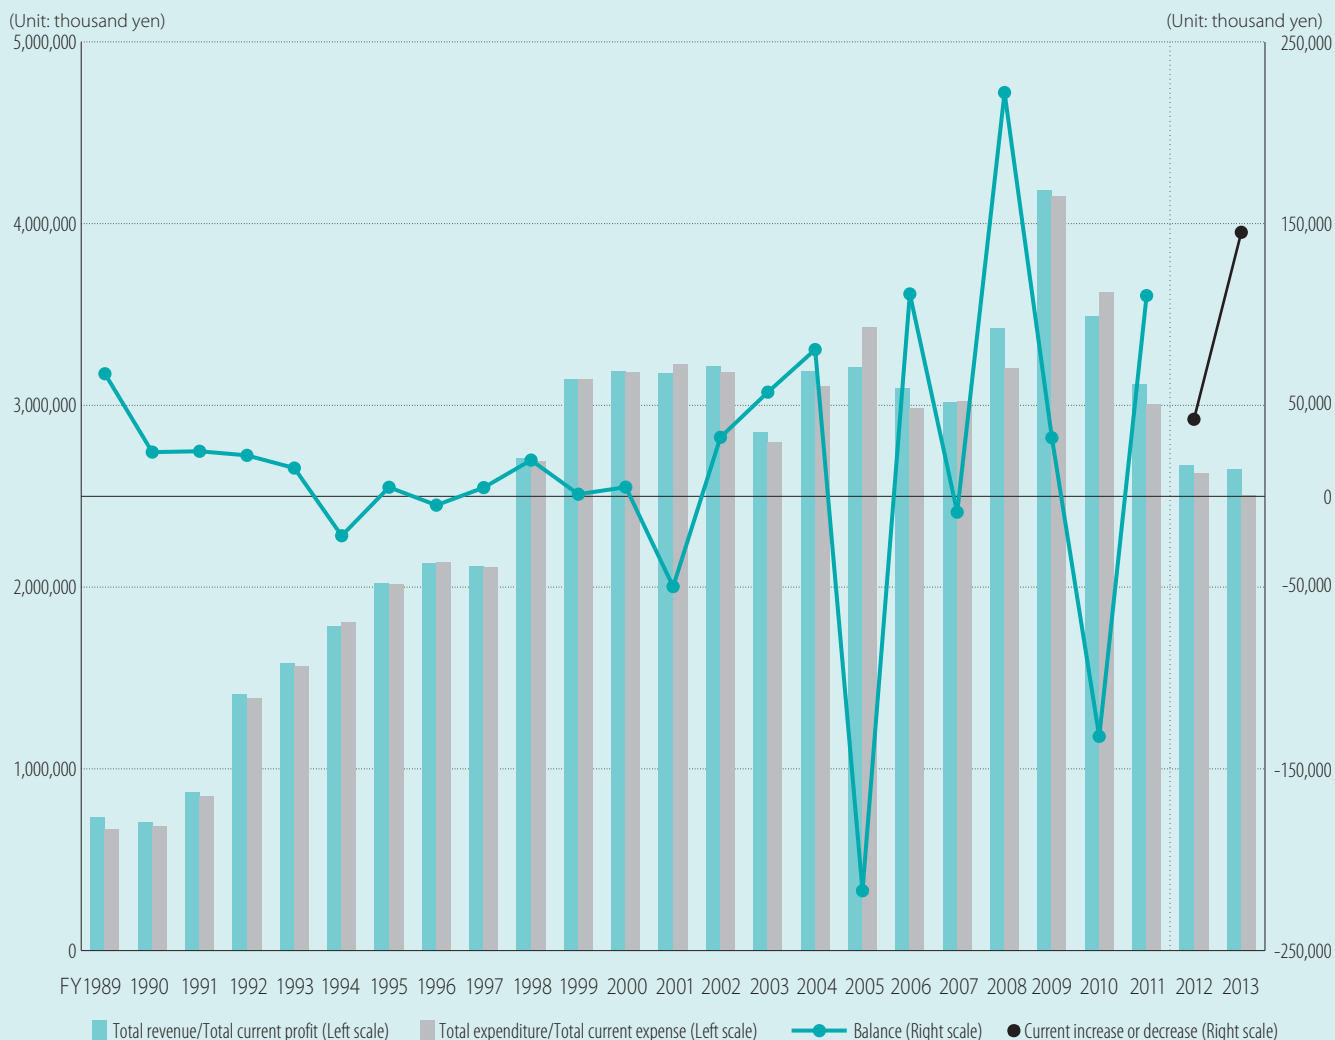

Revenue/Current Profit and Expenditure by Fiscal Year

The table and chart below indicate JICS' total revenue, total expenditure and the balance thereof for FY1989 through FY2011 and total current profit, total current expense and current increase or decrease for FY2012 and FY2013.
